

## TOGETHER ALONE: THE EVENT HORIZON PRACTICE

photo: @pavleheidler

Ex-SITE fellow pavleheidler and TOGETHER ALONE join SITE's Nordic Residency for the second and final time this December. The group will work towards the first public testing of the most recently and accidentally discovered The Event Horizon Practice. The event is scheduled for the evening of Friday, December 7, 2018. The most recent practice in The Celestial Body Series of experimental performative dance practices tackles the notion of exhaustion in the attempt to create the circumstances for dance to arise such that it is perceived by the temporary community as meaningful, and as necessary; and as a viable form of communication and knowledge-exchange.

More information about The Event Horizon Practice will be released closer to the event via social media; [website](#), [Facebook](#) @pavleheidler. If you're already interested and would like to participate in the first public sharing of The Event Horizon Practice, please write directly to [erika@sitesweden.se](mailto:erika@sitesweden.se) and/or [pavleh@gmail.com](mailto:pavleh@gmail.com).
